

ABOUT PHYSICIANS/PROVIDER PORTAL

The goal of the Physician/Provider Portal is to provide physicians with an efficient, fast, comprehensive, intuitive, point of care application that will enhance clinical decision-making, provide for patient safety and improve the quality of patient care.

The Physician/Provider Portal integrates any form of data, whether paper or electronic, and displays it in a web-based windows browser for easy maneuverability. The result is a unified patient electronic health record that is easy to use and maximizes the view of patient information.

To accommodate the unique needs of each hospital, personalization of the Physician/Provider Portal is available: from home page/dashboard layout, internet links, secure messaging, tab/page order, web part application display, to the date/time filter for each tab, and much more.

FEATURES

- Point and click access to Admissions, Laboratory, Radiology, Transcription, Pharmacy, Order Entry, and Clinical Documentation information; plus scanned documents, PACS and other images/ recordings or any other interfaced application
- The Current Status tab – Last 24 hours of Laboratory, Radiology, Reports, Medications, Allergies, Vital Signs, and Intake and Output data displayed on one page.
- Color coded alert flags on the patient lists and results
- Alert Manager – view all your patient’s critical results on one page
- Two-way integrated secure messaging between physicians and medical records staff
- Ability to read, approve, and e-sign patient documents in one system
- Alerts for delinquent, ready to approve, and ready to e-sign documents
- Ability to access reference information on-line from the same application
- Designed by physicians for physicians, with ease-of-use and built-in personalization capabilities
- Personalization available to accommodate the unique needs of each hospital
- System utilization and audit reports available
- Print capability from any tab/page/web part
- Scalable, portable, and easy to deploy

“ If you can dream it, we will deliver it! ”

Key strengths:

- Private and confidential viewing of comprehensive patient information from hospital and/or off-site locations, such as home and physician’s office
- Easy to use, intuitive, web-based, browser front end
- Customization and personalization available
- Integration with Meditech and any other Hospital Information System
- Dictionary synchronization with Meditech (including MIS)
- Alert notification
- Real time patient information
- Unifies the electronic health record

PROVIDES PHYSICIANS & PROVIDERS WITH AN EFFICIENT, FAST, COMPREHENSIVE, INTUITIVE, POINT OF CARE APPLICATION TO ENHANCE CLINICAL DECISION MAKING

PHYSICIAN/PROVIDER PORTAL WEB-BASED

EASY TO USE

WHAT ARE PHYSICIANS LOOKING FOR?

- Personalization
- Intuitive systems that are easy to use like Google
- On-line Chart Completion for every conceivable deficiency
- Flashing Flags and Alerts for deficient and delinquent charts
- Clinical Repository / Decision Support for trending and graphing abnormal values
- Physician Order Communication and e-Messaging

TSG SYSTEMS PHYSICIAN/PROVIDER PORTAL PRODUCT STAGE 2 CERTIFICATION

- Protect Electronic Health Information
- Clinical Lab – Test Results
- Summary of Care
- Electronic Notes
- Imaging Results
