

# Patient Check-In & Registration Kiosk

A Digital Front Door Across the Enterprise

## Modern Intake. Flexible Admissions. Confident Access.

The Patient Check-In & Registration Kiosk simplifies how patients enter care whether they are walking in, visiting the Emergency Department, or checking in at an office or clinic. Designed to reduce delays and manual work, the kiosk empowers patients while supporting staff with accurate, real-time information.

## Designed for Walk-Ins, ED Visits, and Office Check-Ins

From the moment patients arrive, the intake kiosk guides them through the check-in process without requiring staff assistance.

### Patients can:

- Update demographic and contact information
- Capture images of ID and insurance cards
- Pay co-pays or outstanding balances
- Review and sign consent forms digitally
- Scan QR codes for faster check-in
- Print wristbands when required

The kiosk experience is intuitive, touch-friendly, and designed to keep patients moving efficiently through the admissions process.

## Flexible by Design Built for Any Environment

The Patient Check-In & Registration Kiosk adapts to your facility, not the other way around.

### Deployment options include:

- Fixed kiosks for hospital and clinic entry points
- Hand-held kiosk cases for mobile admissions
- Support for high-volume and specialty workflows

Documents are not just stored. For larger health systems, direction mapping functionality helps patients navigate complex campuses, ensuring they arrive at the right location with confidence. And they become usable data.

## WHY HEALTH SYSTEMS CHOOSE OUR DIGITAL INTAKE

- ✓ Faster patient throughput
- ✓ Reduced staff workload
- ✓ Improved data accuracy
- ✓ Regulatory compliance
- ✓ Downtime readiness
- ✓ Better patient experience
- ✓ Customization

## BUILT FOR DOWNTIME CONTINUITY

Patient intake doesn't stop when systems go down.

During downtime, all information entered through the kiosk is securely captured and automatically synchronized back into the EHR once systems are restored without manual re-entry or transcription.

When paired with Downtime Viewer, clinicians gain access to unified patient charts at the point of care, supporting a more complete and resilient downtime strategy across the enterprise.

## Contact Us

## Fully Customizable Workflows

Every organization and every department have unique intake needs. Our Patient Check-in is built with flexibility at its core.

### Customize:

- Buttons, fields, images, and on-screen language
- Intake steps by department or visit type
- ED, outpatient, inpatient, and specialty workflows

This customization creates a more comfortable experience for patients while improving efficiency and consistency for registration staff.

## Visibility, Accountability, and Confidence

Built-in reporting and audit tools give leadership clear insight into admissions activity.

### Health systems can:

- Track exactly what occurred during intake
- Generate audit trails and management reports
- Verify compliance and workflow execution
- Eliminate guesswork during reviews or events

With digital intake tools, verification is always just a few clicks away.

## The Hub of Admissions Efficiency

Patient Intake is more than a check-in tool; it's a centralized admissions workspace.

### Key capabilities include:

- Instant alerts when patients need immediate attention
- Automation that eliminates repetitive manual tasks
- Desk-based intake management for clerks
- Built-in tracking of each step in the intake process

Staff stay informed. Processes stay moving. Nothing falls through the cracks.

## READY TO TAKE THE NEXT STEP?

Let's review your admissions workflows and design a patient intake strategy that improves access, efficiency, and confidence without disrupting care.
